

Agreement Among Pairs of Justices

The following tables show the percentage of cases in which every possible pair of justices found themselves on the same side in a decision—either both in the majority or both dissenting. The first table covers all 71 cases; the second table narrows its focus to cases in which decisions were not unanimous. When reading the first table, for instance, one finds that Justices Abrahamson and Day voted together in 79% of the cases, while the figure for Justices Day and Ceci was 97%.
