The following tables show the percentage of decisions in which every possible pair of justices found themselves on the same side—either both in the majority or both dissenting. The first table covers all 283 decisions; the second table narrows its focus to decisions that were not unanimous. When reading the *second* table, for instance, one finds that Justices Abrahamson and Beilfuss voted together in 33% of the decisions, while the figure for Justices Heffernan and Hanley was 48%.
