Agreement Among Pairs of Justices

The following tables show the percentage of decisions in which every possible pair of justices found themselves on the same side—either both in the majority or both dissenting. The first table covers all decisions; the second table narrows its focus to decisions that were not unanimous. When reading the <u>second</u> table, for instance, one finds that Justices Crownhart and Eschweiler voted together in 22% of the decisions, while the figure for Justices Rosenberry and Owen was 87%.
