¹ Occasionally, a justice will author a separate opinion that concurs in part and dissents in part. For SCOWstats tables, each such vote is categorized as either a dissent or a concurrence according to the following guidelines. If a justice's opinion dissented from the result on one or more issues, it is classified as a dissent. If the opinion concurred with the result on all issues but disputed the majority's reasoning on one or more issues, it is classified as a concurrence.

As explained in this post's introductory comments, certain justices were not on the court for the entire term, and it is not always possible to determine precisely when they began, or ceased, to participate in decisions. Consequently, while the *totals* are accurate for each of the four columns in this table, I have not disaggregated the votes in individual columns (for example, I have not tried to establish how many decisions in the first column were 7-0, how many were 6-0, and so on).
