¹ Justices occasionally author a separate opinion that concurs in part and dissents in part. For this and other tables, each such vote has been categorized as either a dissent or a concurrence according to the following guidelines. If a justice's opinion dissented from the result on one or more issues, it was classified as a dissent. If the opinion concurred with the result on all issues but disputed the majority's reasoning on one or more issues, it was classified as a concurrence.

Agreement Among Pairs of Justices

The following tables show the percentage of decisions in which every possible pair of justices found themselves on the same side—either both in the majority or both dissenting. The first table covers all decisions; the second table narrows its focus to decisions that were not unanimous. When reading the *second* table, for instance, one finds that Justices Owen and Eschweiler voted together in 38% of the decisions, while the figure for Justices Rosenberry and Vinje was 86%.
